The prior art of record Yanagida et al., (US. 5,775, 918) discloses a system for making examination papers and having an automatic marking function. Yanagida is silent regarding "a pixel value modification unit modifying the values of pixels located in the vicinity of the answer column", and "accentuating pixels located in a vicinity of each of the marks checked in any of the answer columns in the image data by giving those pixels a color according to the detected result and the position definition information", and "an output control unit simultaneously outputting the image data accentuated by said image accentuation unit and a corresponding determined intended answer for each question, on a display device to allow an operator to verify whether the corresponding determined intended answer is correct". Lesnick (US. 4,760,606) discloses a method and apparatus for increasing automation and document classifying ability of such system. Lesnick merely describe a digital image processing system that detects a highlighted portion of a document. the detected highlighted portion of a document are then used to identify key words within a document. Lesnick
